OMI PUMPS
DESIGNED FOR YOU

Vision Statement

The Company's vision is to provide the products at the Best price, Quality and Service and to serve the World by manufacturing energy efficient pump sets.

To manufacture motors and pump sets for all the water needs of the people in the World.

The Management

Om Murugan Industries is located in the Industrial City of Coimbatore, and commenced operations in 1974, primarily to serve the agricultural pump sets market with the brand name as "OMI" pump sets. In the next couple of decades it has made rapid strides in the field, and has become the cause of happiness to many people in the country.

The organization manufactures Borewell Submersibles, Agricultural Monoblocks and Openwell Submersibles in the brand name of "OMI PUMPSETS". Single Phase domestic pumps, Single phase Jet pumps, Single Phase Openwell submersibles and Compressors in the brand name of "BARANI PUMPSETS". The Organization exports their products to various countries in the name of "TORREN PUMPSETS", which is an attempt and endeavor to manufacture world class products.

The Organization specializes in the production of Centrifugal Monoblocks, Jet Pumps, Submersible Pumps, Open well submersible Pumps, Compressors and Induction Motors. We are in fact one of the few companies in the world to manufacture Full Stainless Steel Submersible pump sets, in Investment casting as well as Stainless Steel Fabrication.

The Company has a built in area of 60000 sq feet, and is spread in over three locations. It also has two in-house foundries to cater to the needs of the organization whose annual consumption is around 1200 tons of castings. The Company emphasizes the need for all round development of the product and the employees, to improve the quality of work life of the employees and the product.

Today with a turnover of around 300 million rupees the company employs over 130 people directly and an equal number of people indirectly and has over 1000 varieties of pump sets. A wide network of company branches and dealers ensures that the products and services are easily available to the customer in every part of the country.

Om Murugan Industries is committed to manufacturing and supplying Quality Products and Services that delight the customer through Excellent Performance and Cost Effectiveness. The organization will strive to make 'Total Quality' an important tool for the employees to achieve consistent organizational growth.

Opening doors to the *Greener tomorrow*

Expand your thoughts and you will see that after sometime, even the world will be not be a limit for you.

At OMI, we create, encourage opportunities which lead to *greener tomorrow*

OMI Pumps places great emphasis on research and development, which are carried out at our R&D centers of excellence globally. It starts with basic research, where we focus on hydraulics, cavitation, erosion, corrosion and mechanical design. Basic research advances are then applied to product development, where our engineers work closely on the practical implementation of innovative ideas.

Technology for Future

Our range of **Products**

- › V4 / V6 / V8 / V10 Submersibles
- › Centrifugal Monoblocks
- › Twin Type Jet pumps
- › Packer Type Jet Pumps
- › Coupled pumps
- › Dewatering pumps
- › Sewage pumps
- › Compressors
- › Horizontal Open well Submersibles
- › Vertical Open well Submersibles
- › SS Submersible motors and pumps
- › Pressure Boosting pumps
- › (Hor) Pressure Boosting pumps
- › Valves
- › Induction Motors

Inside OMI

The Company has a built in area of 60,000 sq feet and does only the major jobs in-house, the other jobs are contracted.

In house foundries complete with all modern facilities, cater to the needs of the company whose monthly consumption is around 100 tons. The company to meet out its expanding demand has gone in for conversion of CI castings to more than 10 foundries in Coimbatore.

State of the art modern machine shop ensures that the products have the best accuracy. Only the vital operations are done in-house, at present the company as outsourced more than 80% of its machining activities.

All the motor and pump components are dynamically balanced using the latest technology, which increases the pump set life many folds and reduces the wear and tear.

A fully computerized modern testing laboratory ensures that the products are of ISI standards and BEE standards which improves the performance of the product and, and improves the life span resulting in a trouble free product to the consumer.

Quality & Safety @ Every Point

Quality and safety is a top priority for OMI Pumps. Our Quality, Environmental, and Health and Safety management is based on measurable targets that we achieve by implementing targeted improvement programs.

Using ISO 9001-2000 its basis, our globally implemented quality management system complies with national and international standards. Each of our subsidiaries operates in accordance with our global Quality Assurance (QA) standards through its local Quality Control department. Specialists periodically carry out quality audits to ensure that all standards and procedures are met by our subsidiaries around the world.

Footprints of OMI

The company has a wide network of Branches, Distributors and Dealers, which ensures that the products and services are easily available to the customer in every part of the country.

The company also organizes field camps and trains the mechanics and plumbers how to efficiently install the pump sets and solve all the frequently occurring trouble shooting problems in the field itself. Company mechanics and field service personnel regularly visit the fields and collect information on how to improve the performance in the field and to make the products more user friendly.
